QUEZON CITY

COURSE CODE/TITLE:	CPE 010	**SECTION:**	CPE21S4
DATE PERFORMED:	10/09/2026	**DATE SUBMITTED:**	10/09/2026
NAME:	Almirol Joel A. Clifford Lee C. Doplayna Licas Rayven Ferry D Jay Ines	**INSTRUCTOR:**	Engr. Jimlord M. Quejado

ACTIVITY NO. 11.1 Planning

1. PROCEDURE OUTPUT

Write down your 3 proposed systems to develop.

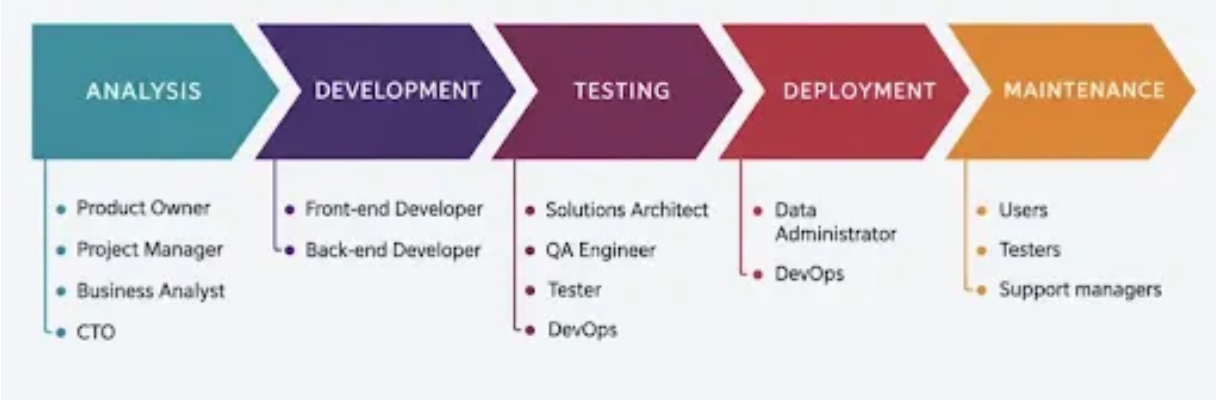

SYSTEM PROPOSED	FUNCTIONS / PURPOSE
Inventory & Point of Sale (POS) System for a Small Store	- **Manages product stocks, records sales, and calculates the total payments and monitor the inventory of the store to help operate efficiently.**
Library Borrowing System	- **Records borrowed and returned books, manages availability and tracks the student's names who borrow books.**
Attendance System	- **Helps manage the attendance making it more efficient than manually taking attendance.**

COMPUTER ENGINEERING

QUEZON CITY

- **Meet with your group and decide what type of SDLC you will use to create a gantt chart and discuss the task responsibilities.**

5 Software Development Life Cycle

- **What possible 10 questions will you ask to find out how the business process works for one of your proposed systems.**

Inventory & Point of Sale (POS) System for a Small Store?:

1. What procedures do you follow when a customer buys a product?
2. How do you calculate the total cost of a customer's purchases?
3. What information do you document for each sale?
4. What happens to the inventory records after a product is sold?
5. How do you handle situations when a product is out of stock?
6. What is your process for receiving and recording new products from suppliers?
7. What steps do you take when a customer returns or exchanges a product?

8. How do you manage discounts and promotional offers?
9. How do you reconcile total sales and cash at the end of the day?
10. What do you do when the actual products in the store don't match the recorded inventory?

Library Borrowing System?:

1. What is the step-by-step trigger, sequence, and end goal of this specific business process from start to finish?
2. What information do you require from a student who wants to borrow a book?
3. What do you do to confirm that a book is available for borrowing?
4. How are damaged, lost, or written-off assets/items formally reported and processed in accounting/inventory logs?
5. What rules must students follow when borrowing books?
6. Does this process need to exchange data with external services, existing software, or historical databases?
7. What do you do when a student returns a book late?
8. What actions do you take when a borrowed book is lost or damaged?
9. What process do you follow when adding new books to the library?
10. If payments, fines, or fees are involved, what payment methods must be supported (cash, credit card, mobile wallets like GCash/PayPal, user balance accounts)?

Attendance System?:

1. Can you describe the process students or employees follow when recording their attendance upon arrival?
2. What details do you collect when recording attendance?
3. Is there a specific time limit for arriving before a student or employee is marked late?
4. What if they forgot to put time in the attendance, do they need to inform authorities to make an adjustment in the attendance?
5. If they doubled that attendance do they need to delete the first one or its okay to have a doubled attendance
6. How do you confirm that the right individual is checking in?
7. How do you fix attendance records when someone forgets to log in or out?
8. Does the professor check the attendance daily or how they make sure that the right student attended?
9. Who has the authority to view, update, or manage attendance records?

2. ANSWERS TO SUPPLEMENTAL ACTIVITY

Copy and paste the questions from the lab and include your answers after.

3. ARTIFICIAL INTELLIGENCE (AI) USE DISCLOSURE STATEMENT

I hereby declare that artificial intelligence (AI) tools were used, if applicable, in the preparation of this academic work. The following indicates the nature and extent of AI assistance:

Tools Used: _____

Examples: ChatGPT, Microsoft Copilot, Grammarly, QuillBot, etc.

Purpose of Use: _____

Examples: grammar correction, idea generation, formatting, summarization, code assistance, explanation of concepts, etc.

Extent of Use: _____

Explain how AI was used and confirm that it did not replace original thinking, analysis, authorship, or completion of the required work.
